

# VERRA MOBILITY

## LOGOS

### PRIMARY LOGOS

Our logo symbolizes that we are a smart and reliable mobility company at the center of the mobility ecosystem. The rotating V's represent our efforts to seamlessly connect each traffic solution and municipality, thereby enabling the world to move more safely and more easily.

The symbol is paired with an all-cap typeface with relatively wide characters that look confident and strong. The size and position are fixed with the symbol to create a balance where neither element dominates. Consistent application of our logo is vital to building and reinforcing a cohesive brand.

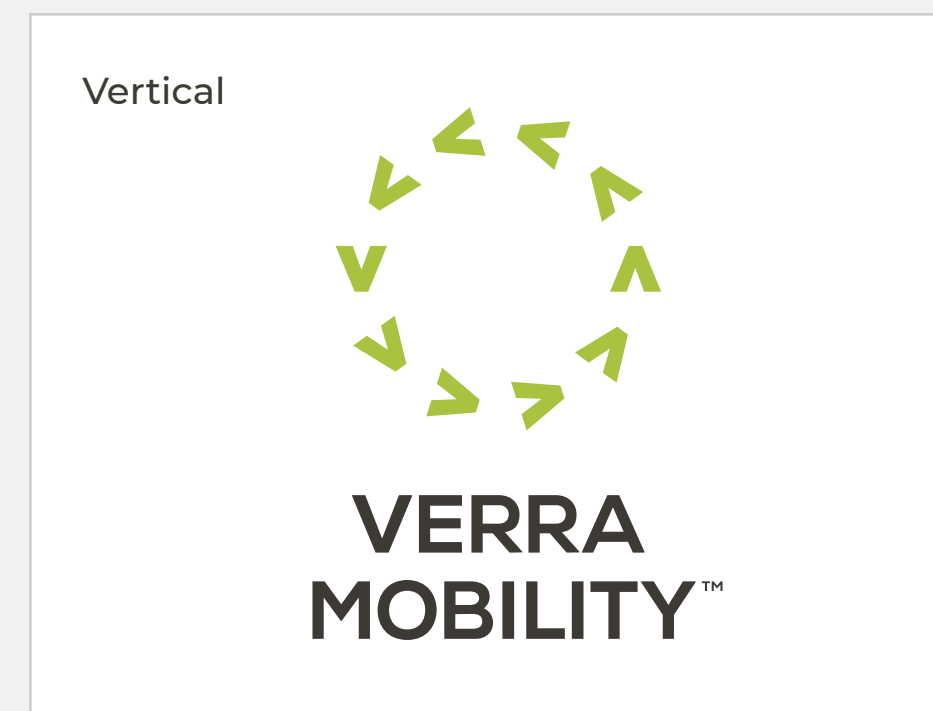

### SECONDARY LOGOS

Our brand should be consistent in all of our applications while still being able to adapt to and be flexible for any given situation. The primary logo is our logo of choice; however, when there isn't enough contrast for the logo to stand out or if the background is too dark/light, please use one of the other options shown here.

Please do not use our logo in any other color or combination of colors aside from the ones shown on this page.

For extreme vertical formats, where the primary logo renders too small to fit the width, please use the vertical logo shown to the right. To preserve the integrity and visual impact of this logo, always maintain adequate clear space.
